

Ms. Singh,

My name is Kenneth Watt and I am a Procurement Specialist II at Duke Energy's, Oconee Nuclear Station. Allow me to take a moment of your busy day to express my sincere gratitude to Brankica Todorovic and Megan Pickler. I had the distinct pleasure of meeting both of these consummate professionals during their visit to Oconee Nuclear on September 13<sup>th</sup>. Upon introduction it was obvious that they were confident, poised, and very competent. I was most impressed with their knowledge of the industry as well as their awareness of the time sensitive nature of our business here at Duke Energy. Though it was apparent that their mission was to build upon the trust and fine reputation already established, they accomplished much, much more. After a most enjoyable luncheon and fellowship, I was left with a very solid impression of how your fine company does business; "Customer First". Because of the way these individuals represented your company, I am most happy to say that they have earned my respect and the opportunity to do business as well. I look forward to working with these outstanding professionals for many years to come. Please pass along my sincere thanks and appreciation to Brankica and Megan for a job well done!

Sincerely,

Kenneth Watt

Procurement Specialist II
